5. Dehyquart 10: 187 grams
6. Phenoxyethanol: 62 grams

7. Distilled Water: 8440grams

## **WHAT IS HAIR HYDRATING SPRAY?**

A hair hydrating spray is a lightweight, water-based product designed to provide instant moisture and hydration to dry or dehydrated hair. It is perfect for reviving dull, frizzy, or damaged hair, leaving it soft, smooth, and manageable. This spray is ideal for all hair types, especially curly, coily, or chemically treated hair that tends to lose moisture quickly.

---

### **WHAT DOES IT DO?**

1. **Hydrates Dry Hair:** The combination of glycerin and propylene glycol attracts and locks in moisture, preventing dryness.
2. **Reduces Frizz:** Dimethicone smooths the hair cuticle, reducing frizz and flyaways.
3. **Softens and Detangles:** Dehyquart acts as a conditioning agent, making hair easier to comb and style.
4. **Adds Shine:** The spray leaves hair looking shiny and healthy.
5. **Protects Hair:** Phenoxyethanol ensures the product remains safe and effective over time.

---

### **HOW TO USE?**

1. Shake Well: Before use, shake the bottle to ensure the ingredients are well mixed.
2. Spray Evenly: Hold the bottle 6-8 inches away from your hair and spray evenly from roots to tips. Focus on dry or damaged areas.
3. Comb Through: Use your fingers or a wide-tooth comb to distribute the product evenly.
4. Style as Desired: Allow your hair to air dry or proceed with your usual styling routine.
5. Use Daily or as Needed: Can be used on damp hair after washing or on dry hair for a quick moisture boost throughout the day.

---

## **BENEFITS:**

- Instant Hydration: Perfect for refreshing hair between washes.
- Lightweight Formula: Won't weigh hair down or leave a greasy residue.
- Versatile: Suitable for all hair types and textures.
