

For DIY **Hair Care Mastery**, you'll need a variety of tools to ensure proper formulation, measurement, mixing, and storage. Here's a list:

## 1. Measuring & Weighing Tools

- **Digital Scale** (for accurate measurements in grams)
- **Measuring Spoons** (for small ingredient quantities)
- **Graduated Cylinders & Beakers** (for measuring liquids)

## 2. Mixing & Blending Tools

- **Hand Mixer or Stick Blender** (for emulsions like creams and butters)
- **Glass Stirring Rods** (for mixing oils and serums)
- **Whisks & Spatulas** (for blending and scooping ingredients)

## 3. Heating Tools

- **Double Boiler or Hot Plate** (for melting butters and waxes)
- **Infrared Thermometer** (to monitor temperatures when heating)

## 4. Storage & Packaging

- **Glass Jars & Bottles** (for storing finished products)
- **Pipettes & Droppers** (for dispensing small amounts of oils)
- **Spray Bottles & Pumps** (for mists and liquid-based products)

## 5. Safety & Sanitation

- **Gloves & Face Mask** (for hygienic handling of ingredients)
- **Rubbing Alcohol (Isopropyl Alcohol 70% or 99%)** (for sanitizing tools)
- **Paper Towels & Clean Cloths** (for wiping surfaces)

## 6. Additional Useful Tools

- **pH Strips or pH Meter** (for balancing pH in water-based products)
- **Funnel Set** (for easy transfer of liquids into bottles)
- **Labels & Marker Pens** (for naming and dating your formulations)
